

SOCIAL CONTENT RESEARCH

Claude Code

What short-form content wins for agentic coding, and how Claude Code can turn rigorous engineering into creator-native proof.

The outcome earns attention. *The workflow earns trust.*

- 1 Authenticated discovery found a Cursor creator partnership at **65.2M views**, confirming that lifestyle outcomes—not editor features—set the category ceiling.
- 2 The strongest Claude-focused Reel in this capture reached **88K likes** with a five-part utility list and a direct comment CTA.
- 3 The five strategy references span **3 platforms and 5 creators**: lifestyle UGC, listicle, tutorial, comedy, and expert advice.

WHAT THIS MEANS FOR CONTENT

Lead with a thing somebody built or fixed. Reveal Claude Code as the agent behind it, then show one visible receipt: the diff, test, PR, or time returned.

Cursor sells the life after shipping. *Claude Code can prove how it shipped.*

Creator content sets the ceiling through personal transformation and app reveals. Official Codex and Copilot content is more product-led; Claude Code has an opening to combine human stakes with repository-level evidence.

TIKTOK · INSTAGRAM · YOUTUBE · META

Who's making content, and *where the gap is.*

LEADER

Cursor + Codex **SCALE**

Cursor pairs creator-native build stories with a broad paid creative mix. Codex adds polished official Shorts and direct work-completion ads.

ACTIVE

Copilot + builders **PROOF**

GitHub demonstrates agent workflows; Replit and Lovable normalize the prompt-to-app outcome for less technical audiences.

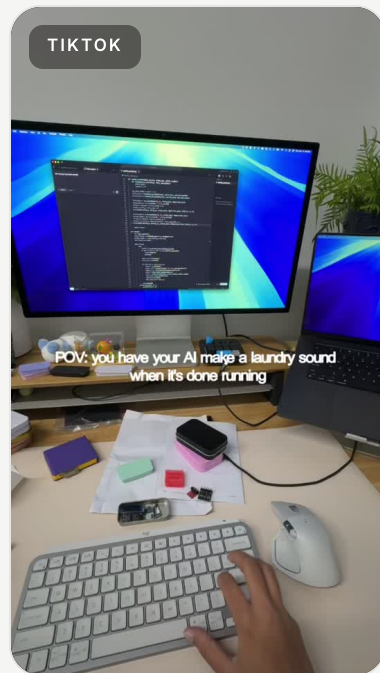

THE OPENING

Claude Code maker proof **NOW**

Make the human outcome the hook, then show the engineering receipt competitors usually skip: tests, diffs, review, and a shipped PR.

TikTok competitors scale through *creator partnerships*.

Authenticated search confirms aggressive paid and partner-led distribution: Cursor sells lifestyle outcomes, Codex sells business utility, and Claude borrows creator trust. Labels distinguish sponsorships from official brand posts.

Four formats map the field. *One owns the ceiling.*

PERSONAL OUTCOME

Lifestyle maker story

A familiar life moment, an autonomous build, and a clean reveal: a Cursor creator partnership reached 65.2M views.

UTILITY

Secret-list tutorial

A high-stakes list plus visible interface proof drove 88K likes on a Claude-focused Reel.

RELATABILITY

Before / after comedy

A 13-second Cursor debugging joke reached 360K views with no dialogue and six overlay lines.

AUTHORITY

Contrarian expert clip

A single instruction from Claude Code's creator reached 21K likes: delete stale rules and test the model fresh.

● ABOUT ADANT AI

Research to action. *Built for you.*

AdAnt AI turns research into action: live trend data surfaces relevant concepts, then **AI agents and UGC creators** help produce adaptable content across **UGC, animation, and TVC**.

5

Analyzed creative strategies

● SAMPLE CONTENT STRATEGY

Five videos to clone. *Start here.*

Each concept keeps one proven mechanic, then swaps in a truthful Claude Code workflow and a visible engineering receipt.

GENERAL INSTRUCTIONS · SAME FOR EVERY STRATEGY

Analyze [INSPIRATION VIDEO URL]

with character as [YOUR AVATAR IMAGE], no text overlay. Only regenerate the first frame for review. You can ask to change character cloth, background setting and anything.

Review the first frame. If it looks good, proceed to rewrite the script to promote the product instead.

When the script is good, proceed with video generation.

Video generation: now clone the video with below model choice:

use Seedance 2.0

Just mention in the instruction using natural language

Build it while you take a walk

@ux_deniza
